Dimensions bottle (h x b x d)	128 x 48 x 30 mm

INGREDIENTS LOTION	FUNCTION	CONCENTRATION (%)
Aqua	Solvent in which the other ingredients are dissolved.	75-100
Propylene Glycol	Water-attracting ingredient that reduces dehydration of the skin. Next to that, it is a solvent and it determines the viscosity of the lotion.	1-5
Sodium Lauroyl Sarcosinate	Surfactant; cleansing and foaming effect because it lowers the surface tension. Also used in many baby products.	0,1-1
Caprylyl glycol	Skin conditioner. Also has preservative properties.	0,1-1
Cocamidopropyl Betaine	Gives the shampoo a cleansing and lathering property.	0,1-1
Glyceryl caprylate	Humectant. Also has preservative properties.	0,1-1
Tocopherol	Increases shelf life of the product by preventing oxidation. Also used as moisturizer.	0,1-1
Potassium sorbate	Natural preservative.	0,1-1
Dipropylene Glycol	Solvent for the preservative system.	0,1-1
Sodium Chloride	Additive.	<0,1

INSTRUCTION FOR USE

Apply the Swash® Hair lotion to the patient's hair. Rub it in for approximately 2 to 3 minutes and do not rinse out. Comb through the hair with a fine-tooth comb and style the hair. Swash® Hair Lotion should be used as a patient-related product and one bottle can be used for 3 hair washes.

TEST RESULTS

Eye irritation test

Results show that the lotion does not cause any irritation of the cornea and the iris. In addition, the conjunctiva do not swell or turn red.

Skin irritation test

Results show that the Swash® Hair Lotion does not cause any irritation of the skin. There was no sign of edema or red skin during or after the test.
